07.02.17	Problems	Kai		
14.02.17	Literature	Venky	Carlos	Marius
21.02.17	Problems	Dimitri		
28.02.17	Literature	Kai	Joe	Alistair
07.03.17	Problems	Joe / Alistair / Helen / Bethany		
14.03.17	Literature	Helen	Bethany	CDTs

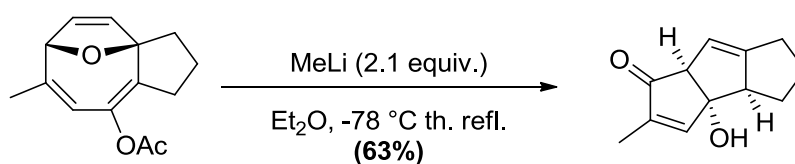

**Literature meetings:** 3 papers from the current literature to be presented each week, on the board.

**Problems:** they should be distributed about a week in advance of the meeting. 4-5 problems or one side of A4 are likely to be enough!

**Do not overcomplicate them:** good problems are supposed to be doable without having to look at the paper or the book they were copied from, and, more importantly, you are supposed to learn something from them! So please find below examples of a good and a bad problem.

### DO

Provide mechanistic rationale for the observed products

### DON'T

Provide structure, diastereomeric ratio and mechanistic rationale for the formation of product **A**.
